Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: 1. Financial 2. Healthcare 3. IT	1. Financial
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the **model_evaluation.ipynb file**?	who want to get into the market now, but it also shows that the market is still not at the bottom. The market is currently in a consolidation phase, and investors are waiting for the next big move. However, the overall market is still in a bearish phase, and it is unlikely that
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the **model_finetuning.ipynb file**?	[{'generated_text': '', but disappointing for those who like to play it safe.\nEven though the market has been up since the start of the year, it's still been a tough year for investors. The S&P 500 is down 1.2% year to date, and the Dow"}]
